Activity 1.1
Getting started with Usable Innovations

The Active Implementation Hub

To be usable, it's necessary to have sufficient detail about an innovation. With detail, you can train educators to implement it with fidelity, replicate it across multiple settings and measure the use of the innovation. With your team, consider a current or upcoming initiative and work through the tasks below.

Thinking about a current or upcoming initiative:

- Develop a description of the innovation that reflects principles, values and expected outcomes

- Identify the essential functional features of the program

- Discuss how your team will know that each of these functional features is in place? What would it look like in a school or district? How would fidelity and performance assessment data be captured?

The Active Implementation Hub, AI Modules and AI Lessons are developed by the
State Implementation & Scaling-up of Evidence-based Practices Center (SISEP) and The National Implementation Research Network (NIRN)
